PREFACE

25X1D

This report is intended to satisfy the requirements of the intelligence community for an accurate, detailed map of Barnaul, specifically locating all known items of intelligence interest. It is based on [REDACTED] TALENT photography and collateral information available through July 1959. Collateral sources utilized include all available maps, ground photographs, and tourist guide books, and in addition, files of the Barnaul newspaper, travel folder materials, and the CIA Industrial Register files.

BRIEF DESCRIPTION OF BARNAUL

General

Barnaul, the administrative and commercial center of Altayskiy Kray, is located on the west bank of the Ob River, approximately 125 miles south of Novosibirsk. An important railroad transportation center and industrial city, Barnaul had an estimated population of 255,000 in 1956, as compared with about 74,000 in 1926. 1/

Industry

Several nationally significant industries are located in Barnaul. The three largest industrial installations are the Lenin Transport Machine Factory 77, the UVS Boiler Factory, and the Mechanical Press Plant. Other important industries include the Arms and Ammunition Plant 17, Iron Foundry "Pravda", locomotive and railroad car repair plants, large textile combines, food processing plants, and three thermal power plants. The major industries, including several under construction, are located in the northern outskirts of the city.

Military Activity

Military installations identified and located in Barnaul include a large air force school and barracks area, an ammunition or explosives storage depot, and Kray militia and MVD headquarters. Three 8-gun medium anti-aircraft batteries, barracks, and military pilot training activity are associated with Barnaul Airfield.

Rail Transportation

Barnaul is an important railroad junction served by two single-track major railroad lines, the Turkestan-Siberian and the South-Siberian railroads. Rail facilities include locomotive and car repair facilities, classification yards, and rail spurs leading to most of the industrial plants in

TOP SECRET CHESS

PIC/R-3/60

the city. Chesnokovka, located five miles east of Barnaul, is also a major railroad center with extensive classification yards and a large railroad car manufacturing plant.

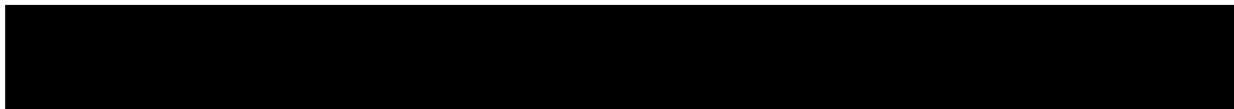

Air Facilities

Barnaul Airfield, a joint civil/military airfield, is located in the western outskirts of the city. This relatively minor airfield has a sod runway, approximately 4,000 feet long, and appears to be used primarily as a pilot training base. 2/
